Summary

I am a 23yr old with a vision to make students realize their potential
and rise above the bar of college curriculum and experiment while
they study so that they don't waste their professional years doing so!

The Idea is to make more Leaders and not merely followers! and to
keep that alive I regularly interact with a lot of students who have
the potential, who are doing exceptional things and I feel these big
companies can enable them to do more!

Designed a course named Machine Learning Fast Track curated for
students delivered in-person by me & my team. I have trained more
than 5K students hands-on and 50K+ students through seminars &
Workshops. This is the Part of regular engagement with those who
matter for the future.

I have demonstrated a history of community management, especially
for developers and students! leading the Community of Google
Crowdsource in India & neighboring countries by influencing them
for contributing & designing+running campaigns in almost 100+
Chapters. I served GDG Mumbai for 2 years from being a Volunteer
to co-organizer. Currently, I am the co-organizer of Google Cloud
Developer Community, Mumbai, and the Lead Ambassador of IEEE
Collabratec in India!

Inspired by my journey I was approached for giving my 1st TEDx
Talk in Mumbai. I was also featured by a national newspaper in
Kerala, by TOI in Gujrat and have been the youngest speaker in
most of the AI/ML conferences hosted by IEEE and Google in India!

Can I help you? If yes, let's connect & Talk!

December 2019 - Present (9 months)

#IamRemarkable is an initiative empowering women and underrepresented
groups to speak openly about their accomplishments in the workplace and
beyond, thereby breaking modesty norms and glass ceilings.
As a facilitator, my role involves hosting workshops and being an ambassador
for #IamRemarkable within my personal and professional networks.
